

SPECIAL SOLVENT FOR DILUTING DESMOPOL AND TECNOTOP

DESMOSOLVENT, is Diluents for DESMOPOL polyurethane membrane and TECNOTOP aliphatic top coat range, their dilutions are recommended by spray application using processing units, also could be used for tools and equipments cleaning.

USES

- Especially recommended as a diluent for the polyurethane membrane DESMOPOL, and the TECNOTOP 2C/2CP, aliphatic varnishes.
- This is recommended to use for cleaning equipment and tools.

Performance	2 l x every 25 kg de DESMOPOL
Density	0,980 ± 0,020 kg / l
Color	Transparent

PHYSICAL CONSTANTS

- Color: Transparent
- Performance: According to product used
- Specific Gravity: 0.869 + / - 0.020 kg / l
- Flash point: 27 ° C
- VOC (supplied): 869.9 g / l

PRESENTATION

In containers of 25l.

COLOR

colorless

ODOR

characteristic

STABILITY OF CONTAINERS

12 months at a temperature of 5 °C to 25 °C in dry sites. If the bucket is opened should be used immediately.

TRANSPORT AND STORAGE

Request our road safety.
